

Seats in the venue are designed to match comfort, with both affordability and functionality.

SPORTING KANSAS CITY

The BOX Seats 903 and 907 adorn the new stadium of Major League American Soccer Club, Sporting Kansas City (formerly Kansas City Wizards). These seats are designed to match comfort with both affordability and functionality, and they serve as the ideal choice to furnish the prestigious arena, with a capacity of over 18,000 seats and

the ability to expand to 25,000 for concerts and other special events. It's spectacular design saw the stadium win the 'Venue of the Year' award and become a finalist for the 'Best New Venue' accolade at The Stadium Business Awards 2012. It was also a finalist for 'Sports Facility of the Year' at the Sports Business Awards that same year.
