

“We thoroughly researched all stadium seats on the market and considering the quality, price, speed and efficiency The Box Seat was better by a mile”.

Operations Manager, James Crespi

GOODWOOD RACING

As part of a £500,000 renovation plan, new seating was installed into the March Grandstand; a highly prominent platform within the Richmond enclosure, positioned directly opposite the Winning Post. The BOX Seat was chosen as the seating system best suited to the venue's specialised requirements, with the current Duke of Richmond's son, Lord March,

playing an integral part in the selection process. The BOX Seat 901 model in a stylish Crystal White now furnishes the newly developed March Stand and, in order to synergise entirely with the existing architecture and stunning countryside backdrop, each component was bespoke prepared in the same shade of white.
